

A Better Kind of Butyrate

Butyrate is a short-chain fatty acid your gut bacteria make from fiber, and the primary fuel for the cells lining your gut. BIOMEnd is butyrate engineered with the amino acid L-Lysine: tasteless, highly soluble, and built to absorb.[†]

In the only published human head-to-head trial, BIOMEnd reached peak blood butyrate over 5x higher than tributyrin, with 1.75x the total exposure and a peak at 20 minutes instead of 51 minutes.[†]

Supports Gut and Digestive Health[†]

Supports a Healthy Microbiome[†]

Promotes GLP-1 production to support appetite control[†]

Promotes nutrient absorption in the gut[†]

Supports the gut-brain axis[†]

Fuels the cells lining your gut[†]
